Dear Google,

For as long as I can remember I have always loved creating crafts and using my imagination to create something great. My mom would always say how creative my projects were, that made me want to continue to create things that made me happy. In design, people use their creativity to create the best possible items for their company. I want to help my company become great by doing just that. I am a hardworking person and am willing to keep pushing myself to keep this company striving. Along with being hardworking, I am also very trustworthy. Being trustworthy means that I can be given a task, and I will make sure to do anything to complete it to my fullest potential. It also means that my co-workers can trust me in doing my part so Spectrum can reach its fullest potential. One last characteristic that I have that is great for someone going into design is I am open minded. Being open minded means that I can consider new ideas and options. This is crucial while working with a group because everybody has different ideas, even though you might not think that it is the best idea, you have to keep your options open and listen to them in order to see their points of view. I think that being an open minded person can expand creativity and is helpful when creating the best plan.

Besides being hardworking, trustworthy, and open minded, I also have experience that has helped me prepare for this position. At Neuqua Valley High School, I have taken three business classes. These classes included Advertising, Visual Media, Vei. These three classes focus on photoshop and designing projects digitally. In these classes we did things from creating our own advertisements, logos and commercials to doing things like photoshopping yourself into a scene. These classes has taught me to be more creative and to work hard to get the grade that I want. I received an A in all classes because I made sure that I was happy with all of my projects before turning them in. Not only did this class teach me how to create designs, but I also had fun. Along with these classes that I took in high school, I am also going to the University of Missouri for Marketing with a minor in communications. Overall these things have prepared me for this job and I am ready to take on the challenge! I think that it is important to enjoy the things that you want to pursue in life. Thank you for considering me for this position, I hope to hear back from you soon!

Thank You,
Ali Drapp
